## PU POURING SHOE MAKING MACHINE

### ➤ DESCRIPTION

Designed to produce top-class leather shoes, leisure shoes, sports shoes and sandals with polyurethane, and also used to make PU soles. The procedure can be adjusted to double-color and double-density.

### ➤ INFORMATION

1. Rationally configured by 10-years experience, with convenient maintenance and high reliability.
2. Comprehensive performance and long service life by casting machine of patented technology.
3. The original liquid circulation in entire machine uses oil-heating and keep temperature constant to make reliable and stable quality of products.

4. Adopt an U-line equipped with automatic temperature control system of heating tunnel, and the operating speed can be adjusted.

➤ SPECIFICATIONS

<i>Process line</i>	<i>15-21m</i>
<i>Max inject Cap.</i>	<i>700cm<sup>3</sup></i>
<i>Qty of Material Tank</i>	<i>3pcs</i>
<i>Tank Volume</i>	<i>120L</i>
<i>Qty of Measuring Pump</i>	<i>3pcs</i>
<i>Rotation Speed of Measuring Pump</i>	<i>60-300 r/min</i>
<i>Measuring Precision</i>	<i>+/- 0.5%</i>
<i>Cleaning Type of Pouring Head</i>	<i>Automatic</i>
<i>Rotation Speed of Pouring Head's Mixture Shaft</i>	<i>4800-8600 r/min</i>
<i>Total Times of Continuous Pouring During Pouring Head's Cleaning Cycle, Times</i>	<i>≥20 pcs</i>
<i>Net weight</i>	<i>4.5 tons</i>
<i>Dimension(D*W*H)</i>	<i>19000*4500*2300mm</i>
